

PASINDU SRI INDUWARA MADHUSHAN

+94 726642993 | ipasindusri@gmail.com | [LinkedIn](#) | [GitHub](#)

Faculty of Information Technology, University of Moratuwa , Colombo, Sri Lanka

PROFILE / SUMMARY

Information Technology undergraduate at University of Moratuwa (2024–Present) with hands-on experience building full-stack applications using Next.js, Node.js, and Spring Boot. Passionate about software engineering, with practical exposure to blockchain integration, secure authentication, and scalable backend architecture through independent projects. Seeking an internship in software engineering to apply and grow these skills in a real-world team environment.

EDUCATION

University of Moratuwa

2024 – Present

BSc (Hons) in Information Technology

Ananda College, Colombo 10

2022/23

GCE Advanced Level

- Z-score: 1.8063
- Engineering Technology:B
- Science for Technology:A
- Mathematics:B.

M/R Kotapola National School

2019

GCE Ordinary Level

- Results 6As

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, C
- **Frontend:** React, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, Spring Boot, Spring Security (JWT)
- **Databases:** PostgreSQL, MySQL, Supabase
- **Tools & Platforms:** Git, GitHub, Cloudinary, Web3Auth, XRPL
- **Languages:** English , Sinhala

PROJECTS

RecipeChain— AI powered blockchain based recipe marketplace

Tools: Next.js, TypeScript, Node.js, Supabase (PostgreSQL), XRPL, Web3Auth

Git hub repository - [frontend](#) ↓ [backend](#)

- Developed a decentralized marketplace to solve unfair culinary creator compensation by enabling secure micro-payments for premium recipes.
- Implemented the core recipe marketplace and secure payment processing via Web3Auth and XRPL, alongside architecting robust backend filtering APIs and type-safe Next.js UI components.
- Integrated AI-driven recipe recommendations and content analysis to help users discover relevant premium recipes, enhancing marketplace discoverability and creator visibility.

ELearningLKA— Learning Management system.

Tools: Next.js, React, TypeScript, Tailwind CSS, Java, Spring Boot, Spring Security (JWT), PostgreSQL, Cloudinary

Git hub repository - [frontend](#) | [backend](#)

- Architected a scalable microservices-ready backend using Spring Boot for secure data management and integrated it with a responsive Next.js frontend to provide a seamless user experience across various devices.
- Integrated JWT for secure role-based access control and Cloudinary for educator media management, while developing modular Spring Boot REST APIs and type-safe Next.js dashboards styled with Tailwind CSS.
- Designed database schemas and REST endpoints for core LMS functionality including course content management, student enrollment, and progress tracking using PostgreSQL and Spring Data JPA.

AirSense— Air Quality Monitoring system

Tools : MH-Z19C CO2 Sensor, ESP32, DFPlayer Mini, Amplifier

- Programmed and wired the MH-Z19C CO2 sensor to accurately capture real-time air quality readings, forming the core sensing unit of the device.
- Designed and built an audio alert system using a DFPlayer Mini and amplifier to play pre-recorded voice alerts when air quality dropped below safe levels, alongside Wi-Fi connectivity status alerts ("Connected" / "Disconnected").
- Designed the physical case/enclosure for the device, housing the sensor, speaker, and electronics in a compact, functional layout.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Other activities:

School cricketer : under 15 cricket team, Kotapola National school, 2018 season

ACHIEVEMENTS

- Certification for finalist — InnovIOT 2025, SLIIT
